

PROJECT: LastCall

Website URL: <https://clarabovry.be>

Description

Our project, **LastCall**, is a reminder and document tracking app designed to help people—especially young adults—stay on top of deadlines they often forget. Whether it's walking around with an expired ID or missing an important school assignment, we are creating LastCall to solve that.

Users will be able to upload documents with expiry dates, input assignment deadlines, and track important personal and vehicle-related documents (like insurance, car registration, lease renewals, etc.). Basically, the app is for everything you need to remember but always forget.

This application is going to cater to a lot of young people, with an age range of approximately 17-30 years old. These people are juggling school, work, and life in general. In a society where everything has an expiration date or a due date, this app becomes not just useful—but essential for young people with busy schedules.

Users can organize their reminders into easy-to-navigate categories such as:

- Assignments
- Personal Documents (like IDs and passports)
- Vehicle & Home (e.g., car insurance, lease agreements, maintenance reminders)

Plus, there's a dashboard-style view where users can see all upcoming deadlines and expiry dates in one place.

Features

User features:

- Create an account
- Approve of said creation with an email
- Login with said account
- Delete your account
- 'I forgot my password' option

Account features:

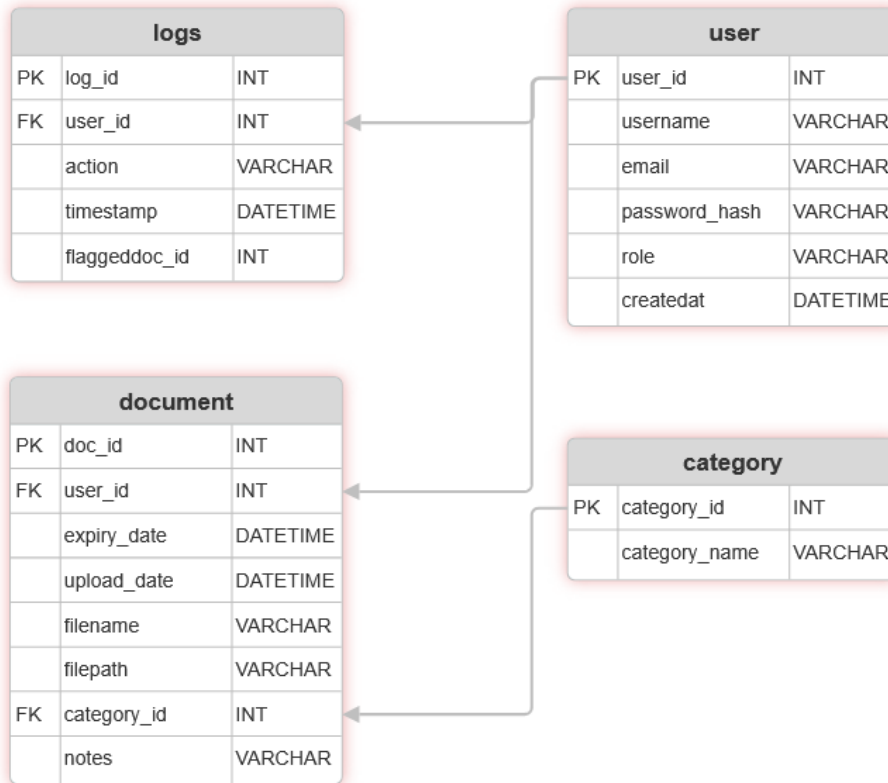

- Upload documents
- Change your password

- Upload a profile picture
- Type expiry dates in
- Create extra custom categories and sub categories

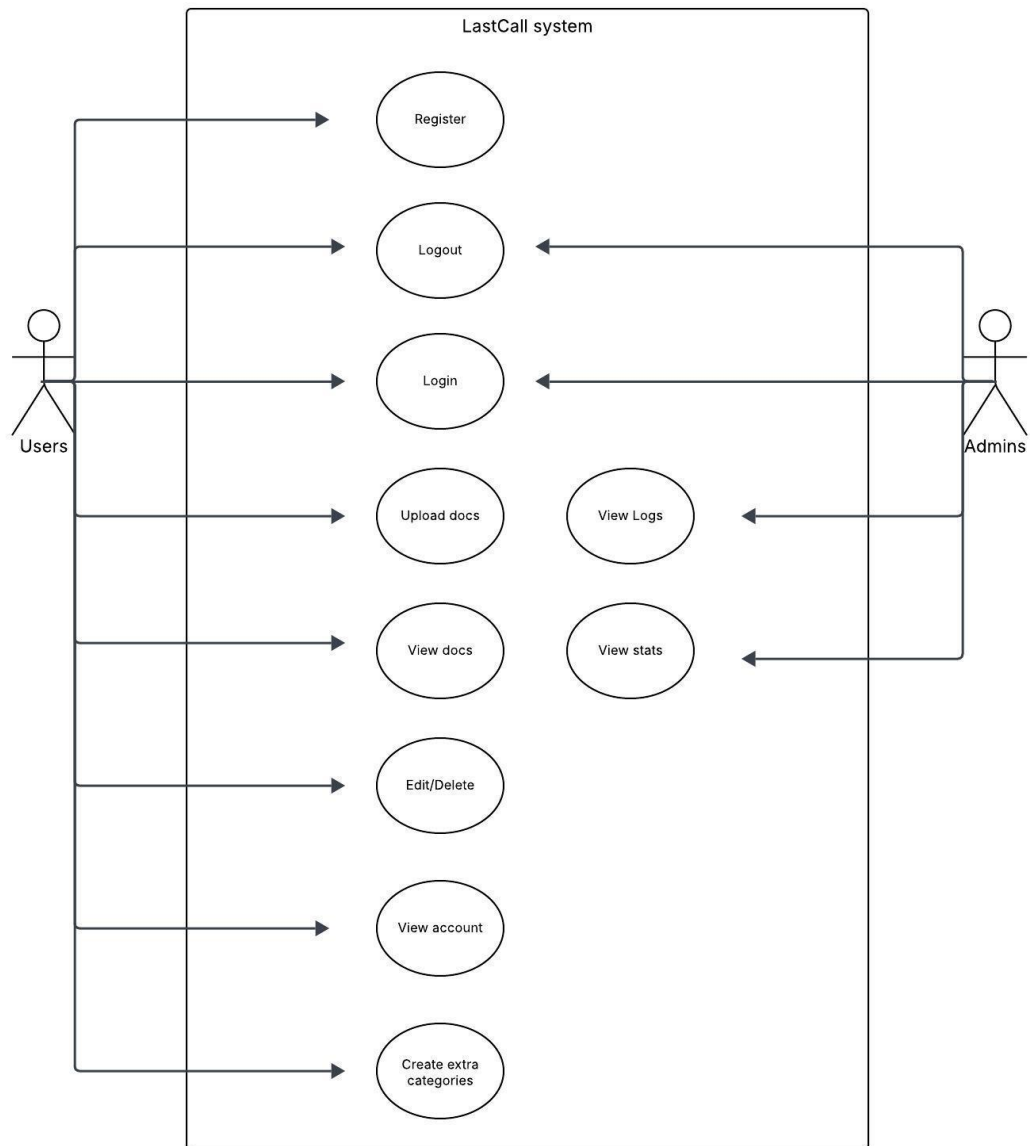

Admin features:

- View logs
- View stats
- Login
- Logout
